

PUBLICATIONS

Books

Integer and Combinatorial Optimization, New York : Wiley, 1988 (with G.L. Nemhauser).

Integer Programming, New York : Wiley, 1998.

Production Planning by Mixed Integer Programming, Springer, New York 2006 (with Y. Pochet).

Edited Proceedings

Economic Decision-Making: Games, Econometrics and Optimisation, (eds J.Gabszewicz, J-F. Richard, L.A. Wolsey) North-Holland 1990.

Integer Programming and Combinatorial Optimization, Proceedings of IPCO3, Erice, Sicily, eds. G. Rinaldi and L.A. Wolsey (April 1993)

The Aussois 2000 Workshop in Combinatorial Optimization, edited by T.M. Lieblich, D. Naddef and L.A. Wolsey, Mathematical Programming B 94, Numbers 2-3, January 2003.

The Aussois 2004 Workshop in Combinatorial Optimization: Theory and Computation , edited by T.M. Lieblich, D. Naddef and L.A. Wolsey, The Aussois Workshop 2004, Mathematical Programming Series B, 105, Numbers 2 and 3, 2006.

Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems, Proceedings of CPAIOR 2007, Brussels, May 2007, eds. P. Van Hentenryck and L.A. Wolsey, LNCS 4510, Springer 2007.

Published articles

Extensions of the group theoretic approach in integer programming", Management Science 18, 74-83, 1971.

Group-theoretic results in mixed integer programming, Operations Research 19, 1691-1697, 1971.

Relaxation methods for pure and mixed integer programming problems, Management Science 18, 229-239, 1972 (with G.A. Gorry and J.F. Shapiro).

Generalized dynamic programming methods in integer programming, Mathematical Programming 4, 222-232, 1973.

Groups, bounds and cuts in integer programming, Revue Belge de Statistique, d'Informatique et de Recherche Oprationnelle 13, 38-44, 1973.

A number theoretic reformulation and decomposition method for integer programming, Discrete Mathematics 7, 393-403, 1974.

Coefficient reduction for inequalities in 0-1 variables, Mathematical Programming 7, 263-182, 1974 (with G.H. Bradley and P.L. Hammer).

Faces for linear inequalities in 0-1 variables, Mathematical Programming 8, 165-178, 1975.

A view of shortest route methods in integer programming, Cahiers du Centre d'Etudes de Recherche Oprationnelle (CERO) 16(4), 317-335, Bruxelles, 1974.

Facets and strong valid inequalities for integer programs, Operations Research 24, 367-372, 1976.

Further facet generating procedures for vertex packing polytopes, Mathematical Programming 11, 158-163, 1976.

The nucleolus and kernel for simple games, or special valid inequalities for 0-1 linear integer programs, International Journal of Game Theory 5, 227-238, 1977.

Cubical Sperner's lemmas as applications of generalized complementary pivoting, Journal of Combinatorial Theory, Series A 23, 78-87, 1977.

Valid inequalities and superadditivity for 0-1 integer programs, Mathematics of Operations Research 2, 66-77, 1977.

Valid inequalities, covering problems and discrete dynamic programs, Annals of Discrete Mathematics 1, 527-538, 1977.

An analysis of approximations for maximizing submodular set functions I, Mathematical Programming 14, 265-294, 1978 (with M.L. Fisher and G.L. Nemhauser).

An analysis of approximations for maximizing submodular set functions II, Mathematical Programming Study 8, 73-87, 1978 (with M.L. Fisher and G.L. Nemhauser).

Best algorithms for approximating the maximum of a submodular set function, Mathematics of Operations Research 3, 177-188, 1978 (with G.L. Nemhauser).

An analysis of approximations for finding a maximum weight Hamiltonian circuit, Operations Research 27, 799-809, 1979 (with M.L. Fisher and G.L. Nemhauser).

Heuristic analysis, linear programming and branch and bound, Mathematical Programming Study 13, 121-134, 1980.

A canonical representation of simple plant location problems and its applications, SIAM Journal on Algebraic and Discrete Methods 1, 261-272, 1980 (with G. Cornujols and G.L. Nemhauser).

A resource decomposition algorithm for general mathematical programming, Mathematical Programming Study 14, 244-257, 1981.

An elementary survey of general duality in mathematical programming, Mathematical Programming 21, 241-261, 1981 (with J. Tind).

Integer programming duality : price functions and sensitivity analysis, Mathematical Programming 20, 173-195, 1981.

The b-hull of an integer program, Discrete Applied Mathematics 3, 193-201, 1981.

On the greedy heuristic for covering and packing problems, SIAM Journal on Algebraic and Discrete Methods 3, 584-591, 1982 (with M. Fisher).

An analysis of the greedy algorithm for the submodular (set) covering problem, Combinatorica 2(4), 417-425, 1982.

On the use of penumbras in blocking and antiblocking theory, *Mathematical Programming* 22, 71-81, 1982.

Maximising real-valued submodular functions : Primal and dual heuristics for location problems, *Mathematics of Operations Research* 7, 410-425, 1982.

Trees and cuts, *Annals of Discrete Mathematics* 17, 511-517, 1983 (with M.W. Padberg).

Fractional covers for forests and matchings, *Mathematical Programming* 29, 1-14, 1984 (with M.W. Padberg).

Strong formulations for multi-item capacitated lot-sizing, *Management Science* 30, 1255-1261, 1984 (with I. Barany and T.J. Van Roy).

Uncapacitated lot sizing : the convex hull of solutions, *Mathematical Programming Study* 22, 32-43 (1984) (with I. Barany and T.J. Van Roy).

Valid linear inequalities for Fixed Charge Problems, *Operations Research* 33, 842-861, 1985 (with M.W. Padberg and T.J. Van Roy).

Sensitivity Analysis for branch and bound IP, *Operations Research* 33, 1008-1023, 1985 (with L. Schrage).

Valid inequalities and separation for uncapacitated fixed charge networks, *Operations Research Letters* 4, 105-112, 1985 (with T.J. Van Roy).

Valid inequalities for mixed 0-1 Programs, *Discrete Applied Mathematics* 14, 199-213, 1986 (with T.J. Van Roy).

Packing and covering a tree by subtrees, *Combinatorica* 6, 245-257, 1986 (with I. Barany and J. Edmonds).

Solving mixed integer programs using automatic reformulation, *Operations Research* 35, 45-57, 1987 (with T.J. Van Roy) .

Lot-size models with backlogging : Strong formulations and cutting planes, *Mathematical Programming*, 40, 317-335, 1988 (with Y. Pochet).

Submodularity and valid inequalities in capacitated fixed charge networks, *Operations Research Letters* 8, 119-124, 1989.

Uncapacitated lot-sizing problems with start-up costs, *Operations Research* 37, 741-747, 1989.

Strong Formulations for Mixed Integer Programming: A Survey, *Mathematical Programming, Series B*, 45, 173-191, 1989.

Formulating the single machine sequencing problem with release dates as a mixed integer program, *Discrete Applied Mathematics* 26, 255-270 (1990) (with M. Dyer).

A recursive procedure for generating all cuts for 0-1 mixed integer programs, *Mathematical Programming* 46, 379-390 (1990)(with G.L. Nemhauser).

Valid inequalities for mixed integer programs with generalised and variable upper bound constraints, *Discrete Applied Mathematics* 25, (1990) 251-261.

Solving Multi-Item Lot Sizing Problems Using Strong Cutting Planes, *Management Science*

37, (1991) 53-67 (with Y. Pochet).

Finding Minimum Cost Directed Trees with Demands and Capacities, *Annals of Operations Research* 33,(1991) 285-303, (with C. Bousba).

Time-Indexed Formulations of Non-Preemptive Single Machine Scheduling Problems, *Mathematical Programming* 54, (1992) 353-367 (with J. Sousa)

Valid Inequalities for the Lasdon-Terjung Production Model, *Journal of Operational Research* 43 (1992) 435-441 (with F. Vanderbeck)

Lot-Sizing Polyhedra with a Cardinality Constraint, *Operations Research Letters* 11,13-18 (1992) (with E.H. Aghezzaf)

Valid Inequalities and Projecting the Multicommodity Extended Formulation for Uncapacitated Fixed Charge Network Flow Problems, *European J. of Operations Research*, 71, 95-109 (1993) (with R. Rardin)

Lot-Sizing with Constant Batches: Formulation and Valid Inequalities, *Mathematics of Operations Research* 18, 767-785 (1993) (with Y. Pochet)

A New Approach to Minimising the Frontwidth in Finite Element Calculations, *Computer Methods in Applied Mechanics and Engineering* 111 (1994) 323-334 (with C.C.de Souza, R. Keunings and O.Zone).

Modelling Piecewise Linear Concave Costs in a Tree Partitioning Problem, *Discrete Applied Mathematics* 50 (1994) 101-109 (with E.H. Aghezzaf).

Polyhedral Characterisation of the Economic Lot-Sizing Problem with Start-Up Costs, *SIAM J. of Discrete Mathematics*, 7 (1994), 141-151 (with C.P.M. van Hoesel and A.P.M. Wagelmans)

Optimizing Constrained Subtrees of Trees, *Mathematical Programming* 71 (1995) 113-126 (with E.H Aghezzaf and T.L. Magnanti)

Polyhedra for Lot-Sizing with Wagner-Whitin Costs, *Mathematical Programming* 67 (1994), 297-324 with Y. Pochet

Integer Knapsacks and Flow Covers with Divisible Coefficients: Polyhedra, Optimization and Separation, *Discrete Applied Mathematics* 59 (1995) 57-74 (with Y. Pochet)

Capacitated Facility Location: Valid Inequalities and Facets, *Mathematics of Operations Research* 20 (1995) 562-582 (with K. Aardal and Y. Pochet)

Progress with Single Item Lot-Sizing, , *European J. of Operational Research* 86 (1995), 395-401

Formulations and Valid Inequalities for the Node Capacitated Graph Partitioning Problem, *Mathematical Programming* 74 (1996) 247-266 (with C.E. Ferreira, A. Martin, C.C. de Souza and R. Weismantel)

An Exact Algorithm for IP Column Generation, *Operations Research Letters* 19,(1996) 150-159 (with F. Vanderbeck)

MIP Modelling of Changeovers in Production Planning and Scheduling Problems, *European J. of Operations Research* 99 (1997)154-165

A Branch and Cut Algorithm for the Node Capacitated Graph Partitioning Problem, Math-

ematical Programming 81, 229-256 (1998) (with C.E. Ferreira, A. Martin, C.C. de Souza and R. Weismantel)

Cutting Planes for Integer Programs with General Integer Variables, Mathematical Programming 81, 201-214 (1998) (with S. Ceria, C. Cordier and H. Marchand).

Optimal Placement of Add/Drop Multiplexers: Static and Dynamic Models, European Journal of Operational Research, 108, 26-35, (1998) (with G. Belvaux, N. Boissin and A. Sutter)

Optimal Placement of Add/Drop Multiplexers: Heuristic and Exact Algorithms, Operations Research 46, 719-728, (1998) (with A. Sutter and F. Vanderbeck)

The 0-1 knapsack problem with a single continuous variable, Mathematical Programming 85, 15-33 (1999) (with H. Marchand).

bc-opt: a Branch-and-Cut Code for Mixed Integer Programs, Mathematical Programming 86, 335-354 (1999) (with C. Cordier, R. Laundry and H. Marchand).

BC-PROD: A specialized branch-and-cut system for lot-sizing problems, Management Science 46, 724-738 (2000) (with G. Belvaux)

Aggregation and Mixed Integer Rounding to solve MIPs, Operations Research 49, 363-371, 2001. (with H. Marchand)

Scheduling Projects with Labor Constraints, Discrete Applied Mathematics 112, 27-52 (2001) (with C.C. Cavalcante, C. de Souza, M.W.P. Savelsbergh, Y. Wang)

Modelling Practical Lot-Sizing Problems as Mixed Integer Programs, Management Science 47, 993-1007 (2001) (with G. Belvaux)

The Uncapacitated Lot-Sizing Problem with Sales and Safety Stocks, Mathematical Programming 89, 487-504 (2001). (with M. Lopicar and Y. Pochet)

On the Wagner-Whitin Lot-Sizing Polyhedron, Mathematics of Operations Research 26, 591-600 (2001) (with O. Pereira).

Non-standard approaches to Integer programming, Discrete Applied Mathematics 123/124 (2002) (with K. Aardal and R. Weismantel).

Cutting Planes in Integer and Mixed Integer Programming, Discrete Applied Mathematics 123/124, 391-440 (2002) (with H. Marchand, A. Martin and R. Weismantel)

Combining Problem Structure with Basis Reduction to solve a Class of Hard Integer Programs, Mathematics of Operations Research 27, 470-484 (2002) (with Q. Louveaux)

Solving Multi-Item lot-sizing problems with an MIP solver using classification and reformulation, Management Science 48, 1587-1602 (2002).

Dynamic Knapsack Sets and Capacitated Lot-Sizing, Mathematical Programming B 95, 53-69 (2003) (with M. Lopicar and H. Marchand)

Tight formulations for some simple mixed integer programs and convex objective integer programs, Mathematical Programming B, 98, 73-88 (2003), (with A. Miller)

Tight MIP Formulations for Multi-Item Discrete Lot-Sizing Problems, Operations Research 51, 557-565 (2003) (with A. Miller)

A Branch-and-Cut algorithm for the single commodity uncapacitated fixed charge network flow problem, *Networks* 41, 143-158 (2003) (with F. Ortega), DOI 10.1002/net.10068

Strong formulations for mixed integer programs: valid inequalities and extended formulations, *Mathematical Programming B* 97, 423-447 (2003). DOI 10.0007/s10107-003-0450-2.

Lifting, Superadditivity, Mixed Integer Rounding and Single Node Flow Sets Revisited, Q. Louveaux and L.A. Wolsey, *4OR* 1, 173-208 (2003).

On Unions and Dominants of Polytopes, *Mathematical Programming* 99, 223-239 (2004).(with E. Balas, A. Bockmayr, N. Pinar)

On the cut polyhedron, *Discrete Mathematics* 277, 279-285 (2004) (with M. Conforti and G. Rinaldi)

Uncapacitated lot-sizing with buying, sales and backloging, *Optimization Methods and Software* 19, 427-436 (2004) (with B. Verweij)

Extended Formulations for Gomory Polyhedra, *Discrete Optimization* 1, 141-165 (2004)(with M. Koeppel, Q. Louveaux and R. Weismantel)

Approximate Extended Formulations (with M. Van Vyve), *Mathematical Programming B* 105, 501-522 (2006)

Two "Well-Known" Properties of Subgradient Optimization (with K. Anstreicher) (to appear in *Math. Prog. B*)

Lot-sizing with Production and Delivery Time Windows, *Mathematical Programming* 107, 471-489 (2006)

The Mixing Set with Flows, M. Conforti, M. Di Summa and L.A. Wolsey, *SIAM J. of Discrete Mathematics* 29, 396-407 (2007).

Lot-Sizing on a Tree M. Di Summa and L.A. Wolsey, *Oper. Res. Lett.* 36/1, 7-13(2007), doi:10.1016/j.orl.2007.04.007

Two "Well-Known" Properties of Subgradient Optimization (with Kurt Anstreicher) (to appear in *Math. Prog. B*)

DP 2005/62 Compact Formulations as a Union of Polyhedra (with M. Conforti) (to appear in *Math. Prog. A*)

DP 2005/70 Multi-Item Lot-Sizing with a Joint Set-Up Cost (with S. Anily and M. Tzur) (to appear in *Math. Prog. A*)

Articles in Collections and Proceedings

Algebraic approaches to integer programming :an exposition and new developments, *Proceedings of the 1971 Annual Conference of the British Operational Research Society.*

Cutting plane methods, *Encyclopedia of Computer Science and Technology*, New York : Marcel Dekker, 1977.

A stochastic programming model for project selection, in *Stochastic Programming*, edited by M.A.H. Dempster, Academic Press, 1980 (with A.G. Lockett and A.P. Muhlemann).

Maximizing submodular set functions : formulations and analysis of algorithms, in *Stud-*

ies on Graphs and Discrete Programming, edited by P. Hansen, Amsterdam : North-Holland, 279-301, 1981 (with G.L. Nemhauser).

Fundamental properties of certain discrete location problems, in *Locational Analysis of Public Facilities*, edited by J.F. Thisse and H. Zoller, Amsterdam : North-Holland, 1983.

Gestion de la production et programmation mathématique, in *Gestion de l'Economie et de l'Entreprise: L'Approche Quantitative*, Bruxelles : De Boeck 1988

Integer Programming, in *Handbooks in Operations Research and Management Science*, Vol.1, Optimization, G.L.Nemhauser, A.H.G. Rinnooy Kan, M.J. Todd, eds., Amsterdam : North-Holland, 1989 (with G. L. Nemhauser).

The uncapacitated facility location problem, in *Discrete Location Theory*, edited by P.B. Mirchandani and R.L. Francis, Wiley 1990. (with G. Cornujols and G.L. Nemhauser).

Formulating Single Machine Scheduling Problems with Precedence Constraints, in *Economic Decision-Making: Games, Econometrics and Optimisation*, eds J.Gabszewicz, J-F. Richard, L.A. Wolsey), North-Holland 1990.

Network Design with Divisible Capacities: Aggregated Flow and Knapsack Subproblems, Proceedings of IPCO2, Carnegie-Mellon University, May 25-27, 1992 (with Y. Pochet)

Nondeterministic Heuristics for Automatic Domain Decomposition in Direct Parallel Finite Element Calculations, Proc. 6th Siam Conf. on Parallel Processing for Scientific Computing(1993) (with D. Vanderstraeten, O.Zone, R. Keunings)

Optimal Trees, Chapter 9 in *Network Models*, Handbooks in Operations Research and Management Science, Vol. 7 eds. M.O.Ball, et al.(1995) (with T.L. Magnanti)

Algorithms and Reformulations for Lot-Sizing Problems, in *Combinatorial Optimization*, eds. W. Cook, L. Lovasz and P. Seymour, DIMACS Series in Discrete Mathematics and Theoretical Computer Science, Vol 20, American Mathematical Society 1995. (with Y. Pochet)

Decomposition of Integer Programs and of Generating Sets, in R. Burkard and G. Woeginger (eds) *Lecture Notes in Computer Science LNCS 1284*, pages 92 - 103, (with G. Cornuejols, R. Urbaniak, and R. Weismantel).

A Rendez-vous Point Selection Algorithm for Videoconferencing Applications, Proceedings of the 2002 IEEE International Conference on Multimedia and Expo, IEEE 2002, Lausanne 689-692 (with B. Macq and J-F. Macq)

Time for Old and New Faces, Chapter 2 in *The Sharpest Cut*, ed. M. Grötschel, MPS-SIAM Series in Optimization, 2004.

K. Andersen, Q. Louveaux, R. Weismantel and L.A. Wolsey, Cutting Planes from Two Rows of a Simplex Tableau, Proceedings of IPCO XII, (eds., M. Fischetti and D.P. Williamson), Springer-Verlag 2007 pp 30-42.

M. Conforti, M. Di Summa and L.A. Wolsey, The Intersection of Continuous Mixing Polyhedra and the Continuous Mixing Polyhedron with Flows, Proceedings of IPCO XII, (eds., M. Fischetti and D.P. Williamson), Springer-Verlag 2007 pp ??.

Working Papers

Group representational theory in integer programming, Technical Report n 41, Operations

Research Center, M.I.T., February 1969.

Mixed integer programming : Discretization and the group theoretic approach, Technical Report n 42, Operations Research Center, M.I.T., June 1969 (Ph.D. Thesis).

An algorithm to determine optimal equivalent inequalities in 0-1 variables, presented at the IBM Symposium on Discrete Optimization, Wildbad, Germany, October 1972.

A comparative study of two algorithms to compute fixed points over unbounded regions, presented at the VIIIth International Symposium on Mathematical Programming, Stanford, August 1973 (with R. Saigal and D. Solow).

MPSARX : A mathematical programming system with an automatic reformulation executor", CORE Computing Report 84-B-01.

The formulation and resolution of production and sequencing problems by combinatorial optimisation, March 1987, Lecture Notes for the Troiseme Cycle Romande en Recherche Operationnelle: La Productique: Theorie et Applications.

Capacity Expansion of the Local Access Network, (with B. Gailly) June 1991

On Dual Solutions in Subgradient Optimization, Université Catholique de Louvain (with K Anstreicher), September 1992.

Time-Indexed Formulations of a Nonlinear Project Scheduling Problem, June 1995 (with Yves Pochet).

Designing Private Line Networks : Polyhedral Analysis and Computation, Core DP 9647 (with B. Brockmueller and O. Gunluk). Revised March 1998, September 2004.

DP 2005/47 LS-LIB: a Library of Reformulations, Cut Separation Algorithms and Primal Heuristics in a High-Level Modeling Language for Solving MIP Production Planning (with Y. Pochet and M. Van Vyve)

DP2007/17 Lattice based extended formulations for integer linear equality systems, K. Aardal and L.A. Wolsey,

DP2007/48 Single Item Lot-Sizing with Non-decreasing Capacities Y. Pochet and L.A. Wolsey
